[Group controls 1] The textbox allows special characters and letters

＋ Add

Description

OS: Windows 10 Home

Description: The textbox from Group controls 1 is designed to accept valid numeric inputs only, but it is currently allowing special characters and letters as well.

Steps to reproduce:

1. Open the application "QA Test App"
2. In the textbox enter letters or special characters (e.g. "Abcd", ".'.)@#$")"
3. Click on the Add To List button
4. All entries including invalid ones are displayed in the listbox

Expected result: The textbox should only accept valid numeric inputs. Letters and special characters should not appear in the listbox after adding them in the textbox and clicking on the Add To List button.

Actual result: After entering numeric inputs, special characters or letters in the textbox and clicking on the Add To List button, both valid and invalid entries are displayed in the listbox.

[Group controls 1] The textbox accepts entry of leading spaces before characters, as well as spaces between each character

➕ Add

Description

Description: Leading spaces before the characters, as well as spaces between each character are allowed to be entered in the textbox from Group Controls 1. After entry and clicking the "Add To List" button, the entered value and all spaces are visible in the listbox.

Steps to reproduce:

1. Open the application "QA Test App"
2. Go to the textbox
3. Enter one or more leading spaces followed by valid characters and also add additional spaces between characters (e.g. "   123 456789")
4. Click on the Add To List button
5. The listbox displays the entry with leading spaces in front of the characters and additional spaces between the characters

Expected result: Leading spaces and spaces between characters should not be permitted in the textbox. After entering the value in the textbox and clicking the Add To List button, the listbox should display the entered characters without any leading spaces and spaces between characters.

Actual result: Leading spaces and spaces between characters are permitted to be entered in the textbox. When this is done and the Add To List button is clicked, the list box displays the entered characters with leading spaces and spaces between characters.

[Group controls 1] Add To List button adds a blank row when the textbox is empty and there are entries in the listbox

+ Add

Description

Description: When the user enters the first entry in the textbox from Group controls 1 and proceeds to add subsequent entries, leaving the textbox empty during the second entry, a blank row is added to the listbox. The blank row is visible after the first entry. Unlimited number of blank rows can be added at any time if the Add To List button is clicked and nothing is entered in the textbox after the first entry.

Steps to reproduce:

1. Open the application "QA Test App"
2. Enter the first entry in the textbox (e.g. "1234")
3. Click the Add To List button
4. Leave the textbox empty
5. Click the Add To List button
6. Select the second entry from listbox. It should be empty.

Expected result: When the textbox is left empty after the first entry and Add To List button is clicked in order to make new entry, blank row will not be added to the listbox.

Actual result: When the textbox is left empty after the first entry and the Add To List button is clicked to make a new entry, a blank row is added to the listbox.

[Group controls 1] Error message is displayed when the textbox is left empty and the Add To List button is clicked

+ Add

Description

Description: When the textbox from Group controls 1 is left empty and the Add To List button is clicked, the error message is displayed with the following text "Unhandled exception has occurred in your application…".

Steps to reproduce:

1. Open the application "QA Test App"
2. Leave the textbox empty
3. Click on the Add To List button
4. The error message "Unhandled exception has occurred in your application…" is displayed

Expected result: When the textbox is left empty and the Add To List button is clicked, the error message "Unhandled exception has occurred in your application…" should be not be displayed. A user friendly warning message is required, warning users that the textbox can't be empty.

Actual result: When the textbox is left empty and the Add To List button is clicked, the error message "Unhandled exception has occurred in your application…" is displayed.

[Group controls 1] Add To List button color is not consistent

To Do ∨   ⚡ Actions ∨

+ Add

Description

Description: The Add To List button from Group controls 1 is currently white in color instead of the expected light grey color.

Steps to reproduce:

1. Open the application "QA Test App"
2. The Add To List button is white in color

Expected result: The Add To List button should be light grey in color, and consistent with the application's design standards.

Actual result: The Add To List button is white in color therefore it is not consistent with the application's design standards.

[Group controls 1] Partial display of a long number in the listbox due to a missing scroll bar

+ Add

Description

Description: When a long number is entered in the textbox from Group controls 1, the scroll bar at the bottom of the listbox does not appear, causing the number to be partially displayed and not fully visible in the listbox.

Steps to reproduce:

1. Open the application "QA Test App"
2. Enter a long number in the textbox exceeding the width of the listbox (e.g. "11111111122222222223333333334444444445555555566666666")
3. Click the Add To List button
4. The listbox at the bottom doesn't have the scroll bar and the entered number is only partially displayed in it.

Expected result: When a long number is entered in the textbox and the Add To List button is clicked, the scroll bar should appear at the bottom of the listbox, enabling users to view the entire number.

Actual result: When a long number is entered in the textbox and the Add To List button is clicked, the scroll bar does not appear at the bottom of the listbox, preventing users from viewing the entire number.

[Group controls 2] Add button deletes the entry if it exists in the listbox

➕ **Add**

Description

Description: When the value is entered in the textbox and the Add button is clicked, the value is not added to the listbox. If the value has been already entered in the listbox, entering this same value in the textbox and clicking the Add button deletes it from the listbox.

Steps to reproduce:

1. Open the application "QA Test App"
2. Enter numeric characters (e.g. "222") in the textbox
3. Select the "Delete from list" checkbox
4. Click the Delete button
5. The entry is displayed in the listbox (e.g. "222")
6. Deselect the "Delete from list" checkbox
7. Enter in the textbox the already displayed numeric characters in the listbox (e.g. "222")
8. Click the Add button
9. The numeric characters that have been displayed in the listbox (e.g. "222") are now deleted from the listbox, instead of adding new entry.

Expected result: Entering the value in the textbox from Group controls 2 and clicking the Add button should add value to the listbox.

Actual result: Entering a value in the textbox from Group Controls 2 and clicking the Add button does not add the value to the listbox.

[Group controls 2] Special characters and letters are allowed in the textbox

➕ Add

Description

Description: The textbox from Group controls 2 is designed to accept valid numeric inputs only, but it is currently allowing special characters and letters.

Steps to reproduce:

1. Open the application "QA Test App"
2. Enter letters and special characters (e.g. "dhsgef()&^%$#") in the textbox
3. Select the Delete from list checkbox
4. Click the Delete button
5. All entries including invalid ones are displayed in the listbox

Expected result: The textbox should only accept valid numeric inputs. Letters and special characters should not be allowed and should not be added to the listbox when clicking the combined Add/Delete button.

Actual result: The textbox allows letters and special characters to be entered, and they are added to the listbox when clicking the combined Add/Delete button. Input validation is missing, allowing invalid characters to be stored in the listbox.

[Group controls 2] The textbox allows entry of leading spaces and spaces between characters

➕ Add

Description

Description: The textbox from Group controls 2 allows entry of leading spaces in front of characters and spaces between characters. After entering a value with spaces and selecting the Delete from list checkbox, clicking the Delete button displays in the listbox both the entered value and all spaces.

Steps to reproduce:

1. Open the application "QA Test App"

2. Go to the textbox

3. Enter one or more leading spaces followed by valid characters and also add additional spaces between characters (e.g. " 523   85674")

4. Select the Delete from list checkbox

5. Click the Delete button

6. The listbox displays the entry with leading spaces in front of the characters and additional spaces between the characters

Expected Result: Leading spaces and spaces between characters should not be permitted in the textbox. After entering a value and clicking the combined Add/Delete button, the listbox should display the characters without spaces.

Actual result: Leading spaces and spaces between characters are allowed in the textbox. After entering a value with spaces and clicking the combined Add/Delete button, the listbox displays characters with leading spaces and spaces between them.

[Group controls 2] Combined Add and Delete button should not be allowed to add blank rows to the listbox

＋ Add

Description

Description: When the user leaves the textbox empty and clicks the Delete button, blank row is displayed in the listbox. This also happens when there are existing entries in the listbox, as clicking the Delete button at any time adds blank rows to the listbox.

Steps to reproduce:

1. Open the application "QA Test App"
2. Leave the textbox empty
3. Select the Delete from list checkbox
4. Click the Delete button
5. Select first entry from the listbox. It is empty.

Expected result: When the textbox is left empty and the combined Add and Delete button is clicked, blank row should not be added to the listbox. Blank rows should also not be allowed between or after entries entered in the listbox.

Actual result: When the textbox is left empty and the combined Add and Delete button is clicked, a blank row is added to the listbox. Blank rows are also allowed between and after the entered entries in the listbox.

[Functionality issue] Clicking on Change background button does not apply changes to the application

+ Add

Description

Description: When a user attempts to change the background of the application by clicking the Change background button, nothing occurs and the background remains the same.

Steps to reproduce:

1. Open the application "QA Test App"

2. Click the Change background button

3. No action is visible and the background of the application remains the same

Expected result: When the Change background button is clicked by the user, the changes should be applied to the background of the application

Actual result: When the Change background button is clicked, no changes are applied to the background of the application.

[UI issue] Spelling mistake in Change background button description

＋ Add

Description

Description: The description text displayed below the Change background button contains a spelling mistake. The word "background" is spelled as "backgroung".

Steps to reproduce:

1. Open the application "QA Test App"
2. The description sentence below Change background button contains a spelling mistake in the word "backgroung". It should be "background".

Expected result: The sentence describing the Change background button should state "This button should change background of application".

Actual result: The sentence describing the Change background button states "This button should change backgroung of application".

[Performance issue] Slow calculation performance after the Calculation button is clicked

+ Add

Details   ⌃   ⚙

Assignee   👤 Unassigned
                    Assign to me

Description

Description: When the user chooses values in the spinner fields, selects a calculation method via the radio buttons for addition, subtraction, multiplication or division and then clicks the Calculate button, the calculation takes a long time to complete.

Labels   None

Parent   None

Sprint   None

Priority   ═ Medium

Steps to reproduce:

1. Open the application "QA Test App"
2. Adjust the value in the first spinner field by using the up and down arrows (e.g. "3")
3. Adjust the value in the second spinner field by using the up and down arrows (e.g. "3")
4. Select one of the radio buttons for the required calculation (e.g Addition)
5. Click on the Calculate button
6. The result (e.g. "6") takes unexpectedly long time to appear in the Result:

Story point estimate   None

Severity   Major

BuildNumber

7.0.1548

Expected result: When the user is trying to execute the required calculation by entering values in the spinner fields, by choosing the appropriate radio button and clicking the Calculate button, the calculation result should be displayed in Result: without any delay.

Developer Note

None

Actual result: When the user enters values in the spinner fields, selects the appropriate radio button, and clicks the Calculate button, the calculation result is displayed in the Result: with a significant delay.

[UI issue] Label text "Divide" for the division radio button should be standardized to "Division"

+ Add

Description

Description: The label text of the radio button for division currently states "Divide", which is inconsistent with the text style used for other calculation options like "Addition", "Subtraction" and "Multiplication". To ensure standardization across application, the text should be updated to "Division".

Steps to reproduce:

1. Open the application "QA Test App"
2. The radio button label text for division "Divide" is inconsistent with other options: "Addition", "Subtraction" and "Multiplication"

Expected result: The label text of the radio button for division should state "Division" and not "Divide".

Actual result: The label text of the radio button for division states "Divide".

[UI issue] The Result: area does not fully display the long numeric values

+ Add

Description

Description: When a long numeric value is displayed in the Result: area, the fifth digit is cut off and not fully visible, even when maximizing the application window or entering full-screen mode.

Steps to reproduce:

1. Open the application "QA Test App"
2. Enter the maximum numeric value into the first spinner field (e.g. "100")
3. Enter the maximum numeric value into the second spinner field (e.g. "100")
4. Select the Multiplication radio button
5. Click the Calculate button
6. Switch the application mode to full-screen
7. Result: area displays "1000" but the fifth digit is not fully visible

Expected result: After the multiplication calculation on maximum numeric values has been executed, the Result: area should display long numeric values without cutting off any digits, even in full-screen mode.

Actual result: After executing the multiplication calculation on maximum numeric values, the Result: area cuts off some digits and does not display the full long numeric value, even in full-screen mode.

[UI issue] URL combobox instruction text is not correctly aligned

+ Add

Description

Description: The URL combobox instruction text "different..." is misaligned with the rest of the text.

Steps to reproduce:

1. Open the application "QA Test App"
2. The URL combobox instruction text starting with "different..." is not correctly aligned with the rest of the text

Expected result: The URL combobox instruction text should be correctly aligned, ensuring visual consistency.

Actual result: The URL combobox instruction text starting with "different..." is not correctly aligned with the rest of the text.

[UI issue] Inconsistent usage of "URL" and "Url"

+ Add

Description

Description: In the application interface, next to combobox both "URL" and "Url" are used. "URL" is visible in the combobox instruction text "Th combobox shows different URL..." and the link label reads "No Url". The usage should be standardized to either "URL" all uppercase letters or "url" all lowercase letters.

Steps to reproduce:

1. Open the application "QA Test App"
2. The instruction text "This combobox shows different URL..." next to the combobox contains the term "URL" in all uppercase letters and the link label "No Url" is a combination of lowercase and uppercase letters. "URL" and "Url" are not standardized.

Expected result: The "URL" used in the application interface should be either all uppercase letters or all lowercase letters "url" to ensure that the application follows a consistent format.

Actual result: The instruction text "This combobox shows different URL..." uses "URL" in all uppercase letters, while the link label "No Url" uses a mix of uppercase and lowercase, creating inconsistency.

[Functionality issue] Incorrect URL format in the combobox dropdown menu

➕ Add

Description

Description: The URL displayed in the combobox is not in the correct format. Instead of displaying http://www.blic.rs, it appears as www.blic.rs

Steps to reproduce:

1. Open the application "QA Test App"
2. Click on the combobox containing URLs
3. Select from dropdown menu www.blic.rs
4. URL www.blic.rs is visible in the combobox. It is displayed without the "http://" prefix.
5. The link label changes to www.blic.rs . It is displayed without the "http://" prefix

Expected result: URLs in the combobox should be displayed in the correct format and should include the "http://" prefix. www.blic.rs should display as http://www.blic.rs .

Actual result: URL in the combobox is not displayed in the correct format. www.blic.rs is displayed without the "http://" prefix. When this URL is selected the link label also changes to this same incorrect format.

[Functionality issue] Error message displayed when selecting and clicking on www.blic.rs URL from combobox

+ Add

Description

Description: When the URL for www.blic.rs is selected from the combobox and clicked on, an error message appears stating "System.UrlFormatException: Invalid URL...". The URL also does not open in the output field.

Steps to reproduce:

1. Open the application "QA Test App"
2. Click on the combobox dropdown menu containing URLs
3. Select the URL for www,blic,rs
4. Click on the selected URL
5. An error message "System.UriFormatException: Invalid URL..." is displayed
6. The URL does not open in the browser

Expected result: Selecting and clicking on the URL for www.blic.rs should not display the following error message "System.UriFormatException: Invalid URL..." and the URL should open correctly in the browser. The warning message that appears should be more user friendly.

Actual result: Selecting and clicking on the URL for www.blic.rs displays the error message "System.UriFormatException: Invalid URL..." instead of opening the URL correctly in the browser. The warning message is not user friendly.

[UI issue] Controls from Group controls 1 misaligned with the overall layout of the application

+ Add

Description

Description: The textbox, the Add To List button and the listbox are not properly aligned within the layout of the application and in relation to other controls such as Add Path to list.

Steps to reproduce:

1. Open the application "QA Test App"
2. Group controls 1 components: the textbox, Add To List button and the listbox are aligned incorrectly to the rest of the application interface

Expected result: The Group controls 1 elements should be correctly aligned with the rest of the elements within the application.

Actual result: The Group controls 1 elements are not correctly aligned with the rest of the application

[Group controls 1] The listbox disappears when the application window is in full screen-mode

+ Add

Description

Description: When the application window is in full-screen mode, the lisbox from Group controls 1 disappears from the application interface.

Steps to reproduce:

1. Open the application "QA Test App"
2. Change the application window to full screen-mode
3. The listbox from Group controls 1 is not visible

Expected result: The listbox from Group controls 1 should remain visible and properly displayed even when the application window changes to full screen mode.

Actual result: The listbox from Group controls 1 is not displayed when the application window changes to full screen mode.

[Group controls 1] Controls do not adjust position when resizing the application vertically

+ Add

Description

Description: When a user attempts to resize the application window vertically, controls from Group controls 1: the textbox, the Add To List button and the listbox remain static and do not adjust their position

Steps to reproduce:

1. Open the application "QA Test App"
2. Resize the application window vertically by dragging the window border upwards or downwards.
3. The textbox, the Add To List button and the listbox from Group controls 1 remain static and do not adjust their positions relative to the other controls within the application

Expected result: When resizing the application window vertically, the controls from the Group controls 1: the textbox, the Add To List button and the listbox should move along with the rest of the application elements and adjust their positions to maintain consistency with the rest of the application.

Actual result: When resizing the application window vertically, the controls from the Group Controls 1: the textbox, the Add To List button and the listbox do not move along with the rest of the application elements and they do not adjust their positions relative to the other controls within the application.

[Group controls 2] Delete button adds entries to the listbox

➕ **Add**

Description

Description: When the value is entered in the textbox and the "Delete from list" checkbox is selected from Group Controls 2, the Add button changes to the Delete button. Clicking the Delete button adds entry to the listbox.

Steps to reproduce:

1. Open the application "QA Test App"
2. In the textbox enter numeric characters (e.g. "456")
3. Select the "Delete from list" checkbox
4. Click the Delete button
5. The listbox displays the entered value (e.g. "456")

Expected result: When the value that has been already entered in the listbox is entered again in the textbox, the "Delete from list" checkbox is selected and the Delete button is clicked, the value should be deleted from the listbox.

Actual Result: When the value already entered in the listbox is entered again in the textbox, the "Delete from list" checkbox is selected and the Delete button is clicked, the entered value is not deleted from the listbox. This value is added to the listbox again.
